DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6,210,293. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed subject matter is very similar. The present invention claims a golf ball comprising a core, an inner cover, and an outer cover. The inner cover has a Shore D hardness of 60 or more and is made from a blend of two or more low acid ionomer resins containing no more than 16% by weight of an alpha, beta-unsaturated carboxylic acid. The outer cover layer has a Shore D hardness of 64 or less and is made from a polyurethane or non-ionomeric thermoplastic and thermosetting elastomers. The '293 patent claims a golf ball with identical layers and features except the optional non-ionomeric thermoplastic and thermosetting elastomer materials for the

outer cover layer. However, the present invention and the '293 patent both claim a polyurethane outer cover. Claiming additional materials for the outer layer does not render a patentable distinction. One skilled in the art would have included optional materials for the outer cover layer to increase manufacturing flexibility.
